

Joining Forces With Your **Brain**

An unparalleled and groundbreaking learning series awaits.

Are you really ready?

Learning Pirate

You should be investing in the brains of the people in your organization

Wouldn't you agree?

It's well known that:

Too much time and money is wasted on ineffective learning, that's both poorly designed and poorly absorbed.

Grasping how behaviors shape habits, then cultivating the skills to transform, are essential for future growth.

Organizational changes demand learning, yet most of us lack the fundamental skills for efficient and effective learning.

Emotionally and cognitively strong brains are able to tackle the unexpected, new learning, demanding projects, and the overall goals of your organization.

So let me ask you,
What do you know about the most powerful tool available to you and your teams?

It's ok, most people out there don't know either. That's because a resource like this didn't exist, until now.

Welcome to **Joining Forces with Your Brain.**

The interactive, scientifically designed learning journey that delves into the intricate world of the human brain.

A journey revolutionizing the way we learn, work and live.

Are you really ready??

[Click here to watch the trailer trailer](#)

How about a little preview of what lies ahead...

Chapters 1–3: Meet the scientists, learn how to navigate the journey, get a taste of your habits and behaviors and see what role the brain plays in it all.

Chapter 4: What is focus and attention?, and how can you work with your brain to strengthen and guide them both. Plus a treasure hunt!

Chapter 5: It's time to explore the brain from the inside! How does it work, communicate and help you do nearly everything you do. Let's experiment and find out!

Chapter 6&7: How does your brain organize information? and how does that impact your learning? Here we activate and explore your brain's executive functions. Who's really in charge?

Chapters 8–10: How do you plan, monitor and regulate your learning? Here we dive into experiments along with tools and practices to monitor, regulate and measure your learning.

Chapter 11&12: It's time to dip our toes into memory, because what's learning without memory? and how can we strengthen and work with our memory systems?

So we agree then? It's time to Join Forces with Your Brain.

Key Features:

- ✓ 12 scientifically designed, immersive video chapters (120mins total)
- ✓ High-level production
- ✓ Interactive brain experiments
- ✓ Available on SCORM Cloud for easy integration and tracking in your existing LMS

Bonuses:

- ✓ Cultivate a genuine learning culture by enabling collective learning journeys
- ✓ Greater awareness of mental health and wellbeing
- ✓ A chance to witness and measure ROI and learning impact on a mass scale

I'M LAUREN BTW

I'm really looking forward to collaborating with you and your team to help ensure that this valuable journey is the start of facilitating a true transformation. A transformation in the way learning is perceived, absorbed and created in your organizations.

Once you see how we operate and learn from the view point of the brain, it's nearly impossible to go back to the way things have always been done. This is how we're going to create change, by joining forces with our brains.

So are you ready to bring more learning, brain science and some meaningful human skills into your organization?

There's no better time than now. Don't you think?

YARR!!

YOU ARE REALLY READY!
